Doctor Testimonials

"Enhanced Vision has an amazing ability to produce quality products that really meet the needs of Low Vision people in the real world. Their products are effective and set the standard for affordability. I whole heartedly applaud their great contribution to the field of Low Vision Rehabilitation."

Donald C. Fletcher, M.D., Director, Center for Low Vision Rehabilitation at California Pacific Medical Center

Senior Scientist at Smith-Kettlewell Eye Research Institute, Helen Keller Foundation Chair for Research in Low Vision Rehabilitation

"It's not easy to design products outside of the standard optical magnifiers but Enhanced Vision continues to do a great job. Once again Enhanced Vision has come out with quality low vision solutions at affordable prices."

Sonya M. Braudway, O.D., Director of Low Vision Services at the Center for Retina and Macular Disease

Active Member of the American Academy of Optometry, the American Optometric Association, the Association for Research in Vision and Ophthalmology, the Florida Optometric Association, and the Division of Blind Services.

"My patients say that your products offer more features than any other they've tried such as portability, brightness and freeze frame options."

Paul Freeman, O.D., Diplomate in Low Vision,
Adjunct Faculty, Pennsylvania College of Optometry, Philadelphia
Chief of Low Vision Services, Department of Ophthalmology,
Allegheny General Hospital, Pittsburgh, PA

Enhanced Vision offers the widest selection of affordable, innovative low vision products for use at home or on the go. If you or someone you love is affected by low vision due to macular degeneration, glaucoma, diabetes or other conditions, Enhanced Vision can help.

Enhanced Vision understands the challenges experienced when one is diagnosed with low vision. Whether it is [Macular Degeneration](#), [Glaucoma](#), [Cataracts](#), [Retinitis Pigmentosa](#) or [Diabetic Retinopathy](#), we have a low vision solution. Our extensive line of low vision aids and electronic magnifiers have helped thousands of people regain their visual independence by providing the ability to read, write, see loved ones, or enjoy the outdoors. We are able to achieve these extraordinary results by offering the most diverse and reliable line of low vision aids and electronic magnifiers available. To learn which magnifier might be right for you visit our [low vision products](#) page.

Learn About Vision Loss

Vision loss is normal to some degree, especially as people age. Most people who experience a decline in their eyesight are able to correct the problem through the use of glasses, contact lenses or surgical procedures. When routine tasks such as shopping, watching television or recognizing friends and family are difficult even when using corrective devices, a person is described as having low vision. The National Eye Institute (NEI), one of the National Institutes of Health, describes low vision as "the best-corrected visual acuity less than 20/40 in the better-seeing eye." This means that vision in the better-seeing eye with the strongest correction possible, is worse than 20/40.

Causes of Low Vision

The National Eye Institute, a leader in research on eye conditions, estimates that more than 3 million American adults over the age of 40 experience vision loss. This condition is most often the
